DETAILED ACTION

Allowable Subject Matter

1. Claims 1-31 allowed.
2. The following is an examiner's statement of reasons for allowance: Prior art failed to establish a power MOSFET a low resistive semiconductor substrate of a first conductivity type, a drift layer of first conductivity type formed on the first surface of the semiconductor substrate, a high resistive epitaxial layer of the first conductivity type formed on the drift layer, trenches formed in the epitaxial layer and the drift layer, gate electrodes formed in the trenches with gate insulating films interposed between the walls of the trenches and the gate electrodes, first and second low resistive source layers of the first conductivity type formed in a surface region of the epitaxial layer adjacent to the gate insulating films, a low resistive base layer of a second conductivity type formed in the surface region of the epitaxial layer between the first and the second source layers, a source electrode electrically and commonly connected to the source layers and the base layer, drain electrode electrically connected to the second main surface of the semiconductor substrate where the drift layer has an impurity concentration higher than that of the epitaxial layer and the epitaxial layer intervening between the trenches is depleted in a case where no voltage is applied between the source electrode and the gate electrodes.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
